

Information about C-PODs in SAMBAH

Watch out for our C-pods!

SAMBAH has placed 300 porpoise click detectors called C-PODs (see picture on the right) all over the Baltic Sea to be able to estimate the number and distribution of the Baltic harbour porpoise.

300 C-PODs may seem a lot, but in such a large study area, the information from every detector is of importance. We therefore ask you to watch out for our C-pods! If the pod is safely attached to its moorings, please let it sit. If you find one floating astray or stranded on a beach, please contact us! And please avoid fishing or trawling close to the detectors!
